PRCP-1005-Forest Cover Prediction

Problem Statement

Task 1:-Prepare a complete data analysis report on the given data.

Task 2:-Create a predictive model which helps to predict seven different cover types in four different wilderness areas of the Forest with the best accuracy..

Dataset Link:

The actual forest cover type for a given 30 x 30 meter cell was determined from US Forest Service (USFS) Region 2 Resource Information System data. Independent variables were then derived from data obtained from the US Geological Survey and USFS. The data is in raw form (not scaled) and contains binary columns of data for qualitative independent variables such as wilderness areas and soil type.

This study area includes four wilderness areas located in the Roosevelt National Forest of northern Colorado. These areas represent forests with minimal human-caused disturbances, so that existing forest cover types are more a result of ecological processes rather than forest management practices.

The goal of the Project is to predict seven different cover types in four different wilderness areas of the Roosevelt National Forest of Northern Colorado with the best accuracy.

Data Fields

Elevation - Elevation in meters

Aspect - Aspect in degrees azimuth

Slope - Slope in degrees

Horizontal_Distance_To_Hydrology - Horz Dist to nearest surface water features

Vertical_Distance_To_Hydrology - Vert Dist to nearest surface water features

Horizontal_Distance_To_Roadways - Horz Dist to nearest roadway

Hillshade_9am (0 to 255 index) - Hillshade index at 9am, summer solstice

Hillshade_Noon (0 to 255 index) - Hillshade index at noon, summer solstice

Hillshade 3pm (0 to 255 index) - Hillshade index at 3pm, summer solstice

Horizontal Distance To Fire Points - Horz Dist to nearest wildfire ignition points

Wilderness_Area (4 binary columns, 0 = absence or 1 = presence) - Wilderness area designation

Soil_Type (40 binary columns, 0 = absence or 1 = presence) - Soil Type designation

Cover_Type (7 types, integers 1 to 7) - Forest Cover Type designation

The wilderness areas are:

- 1 Rawah Wilderness Area
- 2 Neota Wilderness Area
- 3 Comanche Peak Wilderness Area
- 4 Cache la Poudre Wilderness Area

The soil types are:

- 1 Cathedral family Rock outcrop complex, extremely stony.
- 2 Vanet Ratake families complex, very stony.
- 3 Haploborolis Rock outcrop complex, rubbly.
- 4 Ratake family Rock outcrop complex, rubbly.
- 5 Vanet family Rock outcrop complex complex, rubbly.
- 6 Vanet Wetmore families Rock outcrop complex, stony.
- 7 Gothic family.
- 8 Supervisor Limber families complex.
- 9 Troutville family, very stony.
- 10 Bullwark Catamount families Rock outcrop complex, rubbly.
- 11 Bullwark Catamount families Rock land complex, rubbly.
- 12 Legault family Rock land complex, stony.
- 13 Catamount family Rock land Bullwark family complex, rubbly.
- 14 Pachic Argiborolis Aquolis complex.
- 15 unspecified in the USFS Soil and ELU Survey.

- 16 Cryaquolis Cryoborolis complex.
- 17 Gateview family Cryaquolis complex.
- 18 Rogert family, very stony.
- 19 Typic Cryaquolis Borohemists complex.
- 20 Typic Cryaquepts Typic Cryaquolls complex.
- 21 Typic Cryaquolls Leighcan family, till substratum complex.
- 22 Leighcan family, till substratum, extremely bouldery.
- 23 Leighcan family, till substratum Typic Cryaquolls complex.
- 24 Leighcan family, extremely stony.
- 25 Leighcan family, warm, extremely stony.
- 26 Granile Catamount families complex, very stony.
- 27 Leighcan family, warm Rock outcrop complex, extremely stony.
- 28 Leighcan family Rock outcrop complex, extremely stony.
- 29 Como Legault families complex, extremely stony.
- 30 Como family Rock land Legault family complex, extremely stony.
- 31 Leighcan Catamount families complex, extremely stony.
- 32 Catamount family Rock outcrop Leighcan family complex, extremely stony.
- 33 Leighcan Catamount families Rock outcrop complex, extremely stony.
- 34 Cryorthents Rock land complex, extremely stony.
- 35 Cryumbrepts Rock outcrop Cryaquepts complex.
- 36 Bross family Rock land Cryumbrepts complex, extremely stony.
- 37 Rock outcrop Cryumbrepts Cryorthents complex, extremely stony.
- 38 Leighcan Moran families Cryaquolls complex, extremely stony.
- 39 Moran family Cryorthents Leighcan family complex, extremely stony.
- 40 Moran family Cryorthents Rock land complex, extremely stony.

Target variable: Cover_Type (7 categories)

Model Comparison Report

Create a report stating the performance of multiple models on this data and suggest the best model for production.

Report on Challenges faced

Create a report which should include challenges you faced on data and what technique used with proper reason.

Note:-All above tasks have to be created on a single jupyter notebook and share the same for final submission of the project.
